

Tips for Utilising Copilot in Your Business

It's one thing to say your company is going to start using generative AI in its day-to-day operations and another to get real value out of the technology. What does it take to make Microsoft Copilot live up to its expectations and "fix work?" We've done the work to provide answers to those questions below.

Find mundane tasks to automate

64%

of employees have trouble keeping up with their day-to-day work. Automation frees them up to do more interesting, value-adding work.

Use AI to make everyday work easier

Copilot can support with:

- ✔ Summarising meetings.
- ✔ Drafting emails.
- ✔ Searching databases.
- ✔ Answering customer questions.
- ✔ Training new hires.

Device choice matters

The Microsoft Surface Copilot+ isn't just fast. It can handle an astonishing 48 trillion operations per second (TOPS). That power runs smoother, smarter, and faster AI tasks, helping you get more done without slowing down.

Team up with a Microsoft partner

Their expertise can help bridge skills gaps and make Copilot easier to adopt.

Small and medium organisations using Copilot are seeing three-year ROIs from 132% to 353%, thanks to higher revenue, lower costs and faster onboarding. With the right support, your business can see the same results.

As a Microsoft Gold Partner and the world's only dedicated Surface specialist, Kingsfield IT is the partner to help you make it happen
